

We are Hiring!

RESEARCH TECHNICIAN IN COMPOSITE TESTING

We seek a highly motivated Research Technician to join our Technology Consortium, ENERCOMP. As a key member of our organization, you will play a pivotal role in managing research & technology projects in this consortium.

Responsibilities:

- Support mechanical testing of composites for ENERCOMP portfolio of technology projects.
- Support and execute the generation of a unique database of composite characterization in extreme conditions.
- Execute research tasks and analyzing data.
- Support the development of a state-of-the-art experimental platform in the field of testing composite materials for in-situ testing in conditions relevant to the energy sector (high pressure, high temperature, extreme environments), as well as maintenance and training on this platform.
- Participate in the development of patent applications.

Qualifications:

- BS or MS level in mechanics or related fields.
- Experience in all standard mechanical testing of composite in static, fatigue, and aging conditions.
- Experience in materials for Energy, Oil & Gas, and/or Hydrogen is a must.
- Strong analytical and problem-solving skills.
- Exceptional technological skills.
- Proficiency in the execution of technical projects.
- Proficiency in spoken and written English.

We are Hiring!

 We invite you to apply for this exciting opportunity. Join us at ENERCOMP and contribute to ground-breaking advancements in the field of composite materials.

Application Requirements:

- Detailed CV.
- Cover letter.
- List of three referees with full contact information, including full details of last employer

Interested applicants should send their complete application package to Prof. Gilles Lubineau (gilles.lubineau@kaust.edu.sa) (With a systematic cc to khathijah.osman@kaust.edu.sa).

PLEASE USE this as the subject of your email: **ENER_RT_COMPO**.

Only applications providing all requirements will be considered further.

We are Hiring!

Technology Consortium for Composites
Performance in Energy Applications

ENERCOMP is a technology consortium on **Composite Asset Performance in Energy Applications**. It aims at increasing confidence and enabling further penetration of composite materials in the Energy sector by availing new technologies for integrity management. Its mission is to develop innovative integrity management solutions through collaborations with industry and academia by translating fundamental research into deployable technologies.

OUR VISION

To increase confidence and enable further penetration of composites materials in the Energy sector by availing new technologies for enhancing composite performance and integrity management.

OUR MISSION

To develop innovative integrity management solutions through collaborations with industry and academia by translating fundamental research into deployable technologies.

Open Positions

- Research Scientist in Composite Integrity
- Research Scientist in Computational Integrity of Composites
- Research Scientist in AI and Digital Twins of Composites
- Research Scientist in NDT
- Research Technician in Composite Testing.
- Research Technician in NDT
- Research Technician in Sensing Devices for Composites
- Project Management Officer
- Admin Assistant

We are Hiring!

KING ABDULLAH UNIVERSITY OF SCIENCE AND TECHNOLOGY (KAUST)

Established in 2009, King Abdullah University of Science and Technology (KAUST) is a graduate research university devoted to finding solutions for some of the most pressing scientific and technological challenges in the world as well as Saudi Arabia in the areas of food and health, water, energy, environment and the digital domain. **KAUST** is a curiosity-driven, interdisciplinary problem-solving environment, with state-of-the-art labs, distinguished faculty and talented students.

KAUST brings together the best minds from around the world to advance research. More than 120 different nationalities live, work and study on campus. KAUST is also a catalyst for innovation, economic development and social prosperity, with research resulting in novel patents and products, enterprising startups, regional and global initiatives, and collaboration with other academic institutions, industries and Saudi agencies.

ENERCOMP is located on the **Mechanics of Composites for Energy and Mobility Laboratory (MCEM)**. Building 4, Level 2.
